www.magal-s3.com

Magal S3 is a leading international provider of solutions and products for physical and cyber security, safety and site management.

Magal S3 has a 45 year track record in the successful deployment of tailored solutions and customized systems for seaports in dozens of sites worldwide.

The Threat and the ISPS Code

Free world trade is threatened by terror, piracy, organized crime, drug and goods trafficking, illegal immigration, and above all - the fear of a dirty bomb being smuggled into a mega city. Magal provides tailored cost-effective integrated solutions, fully compliant with the ISPS code.

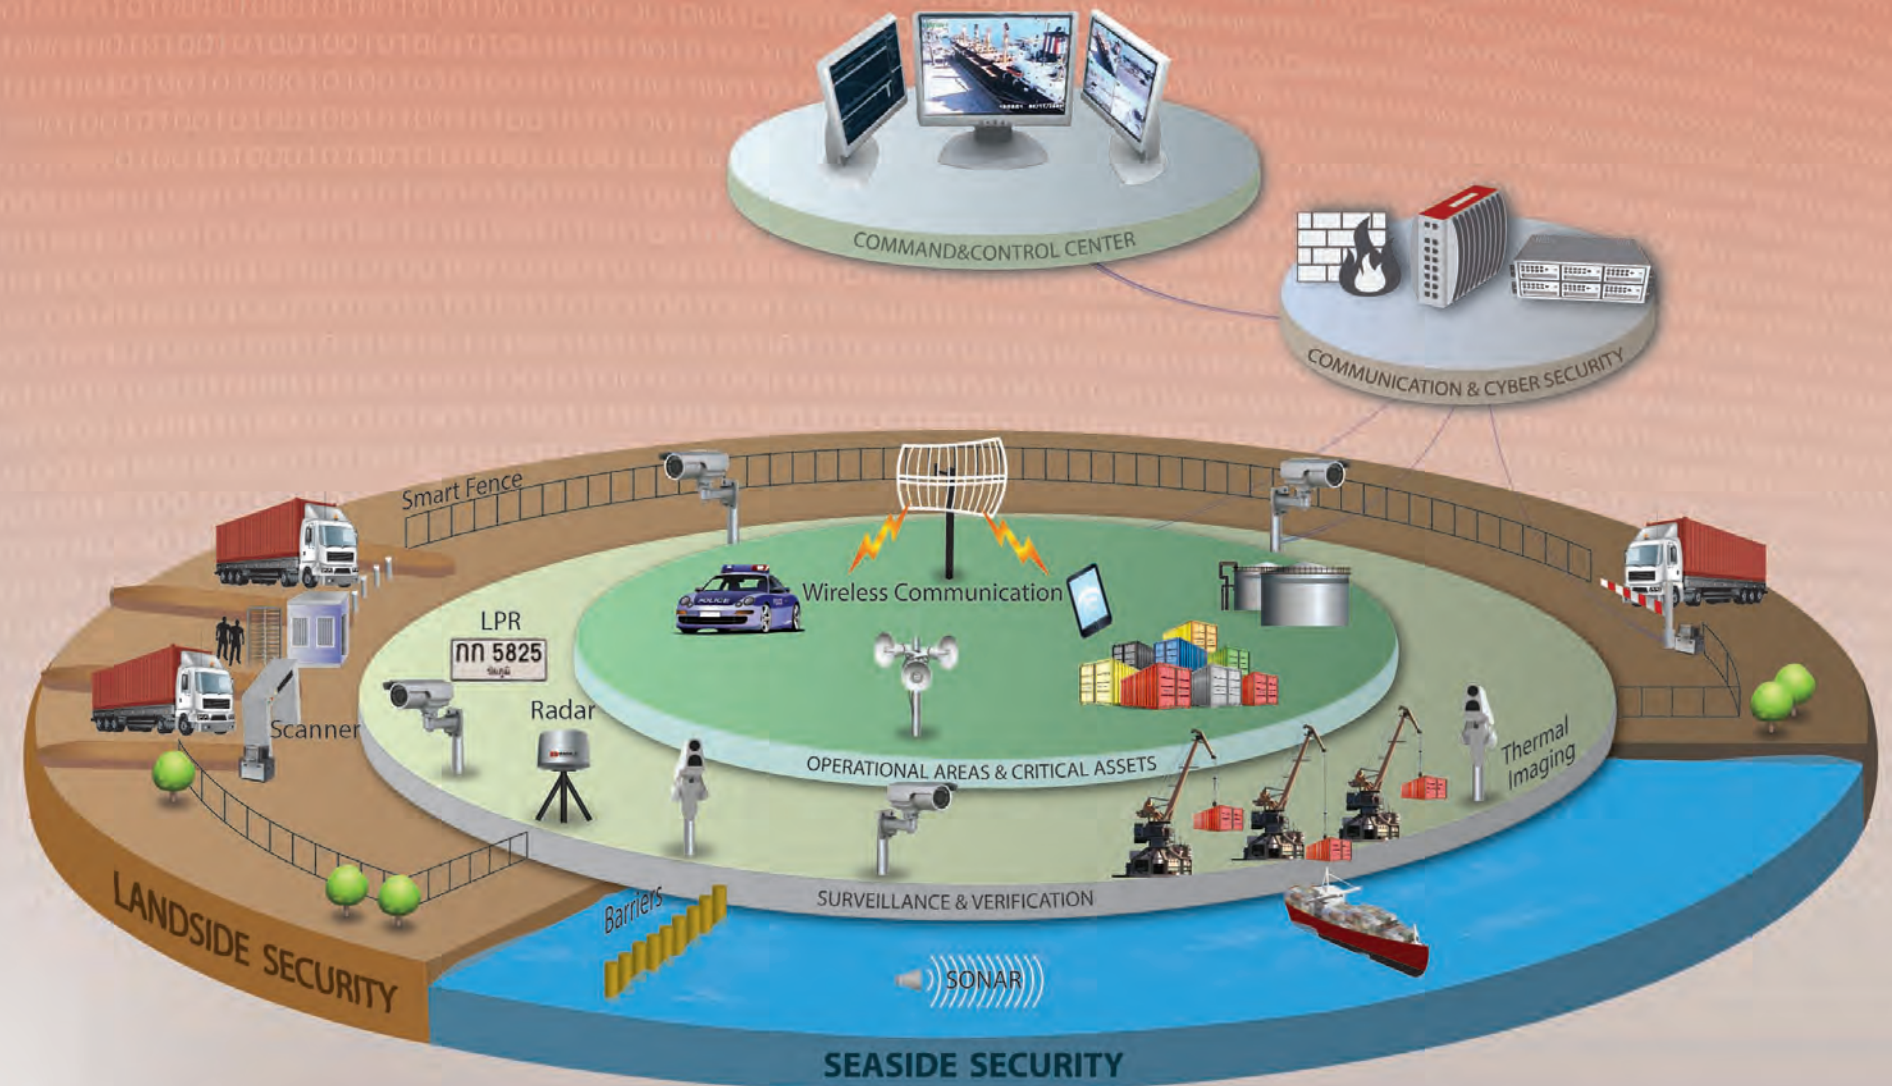

The Challenge

The biggest challenge is to secure ports without putting an unnecessary burden on the massive flow of people, vehicles, cargo, containers and ships. A comprehensive solution must address the unique challenges of seaports, such as:

- Covering the landside perimeter as well as the seaside
- Securing canals, bridges, oil & gas storages and other sensitive assets
- Managing multiple type of gates – for cars, trains, ships, conveyors, etc.
- Enhance loss prevention from warehouses, bonds, etc.

All the above must sustain marine and harsh environmental conditions.

Multi-layer Integrated Solutions

Value Proposition

Magal S3 delivers tailored integrated solutions based on :

- Core, in-house developed products: perimeter security, CCTV and cyber security
- Third party equipment - cameras, access control, communication and more
- Integration of subsystems by a sophisticated management systems - Fortis4G
- Full life-cycle support, from the initial design, to implementation, commissioning, training and maintenance

The Benefits of Integrated Solutions

- Holistic management of physical and cyber events
- Exceptional situation awareness via 2D/ 3D maps, super-positioned alerts and correlated video
- Simplified operation and communication through automation
- Faster reaction of first responders
- Improved compliance through tailored and event-driven procedures
