Multi-layer Outdoor Solutions

Magal S3 is a leading international provider of solutions and products for physical and cyber security, safety and site management.

Proven Track Record

- Experience - 45+ years
- Proven technology
- Operating - in 80+ countries
- Tailored Integration
- Install base - 50+ airports
- Full life cycle support

Value Proposition

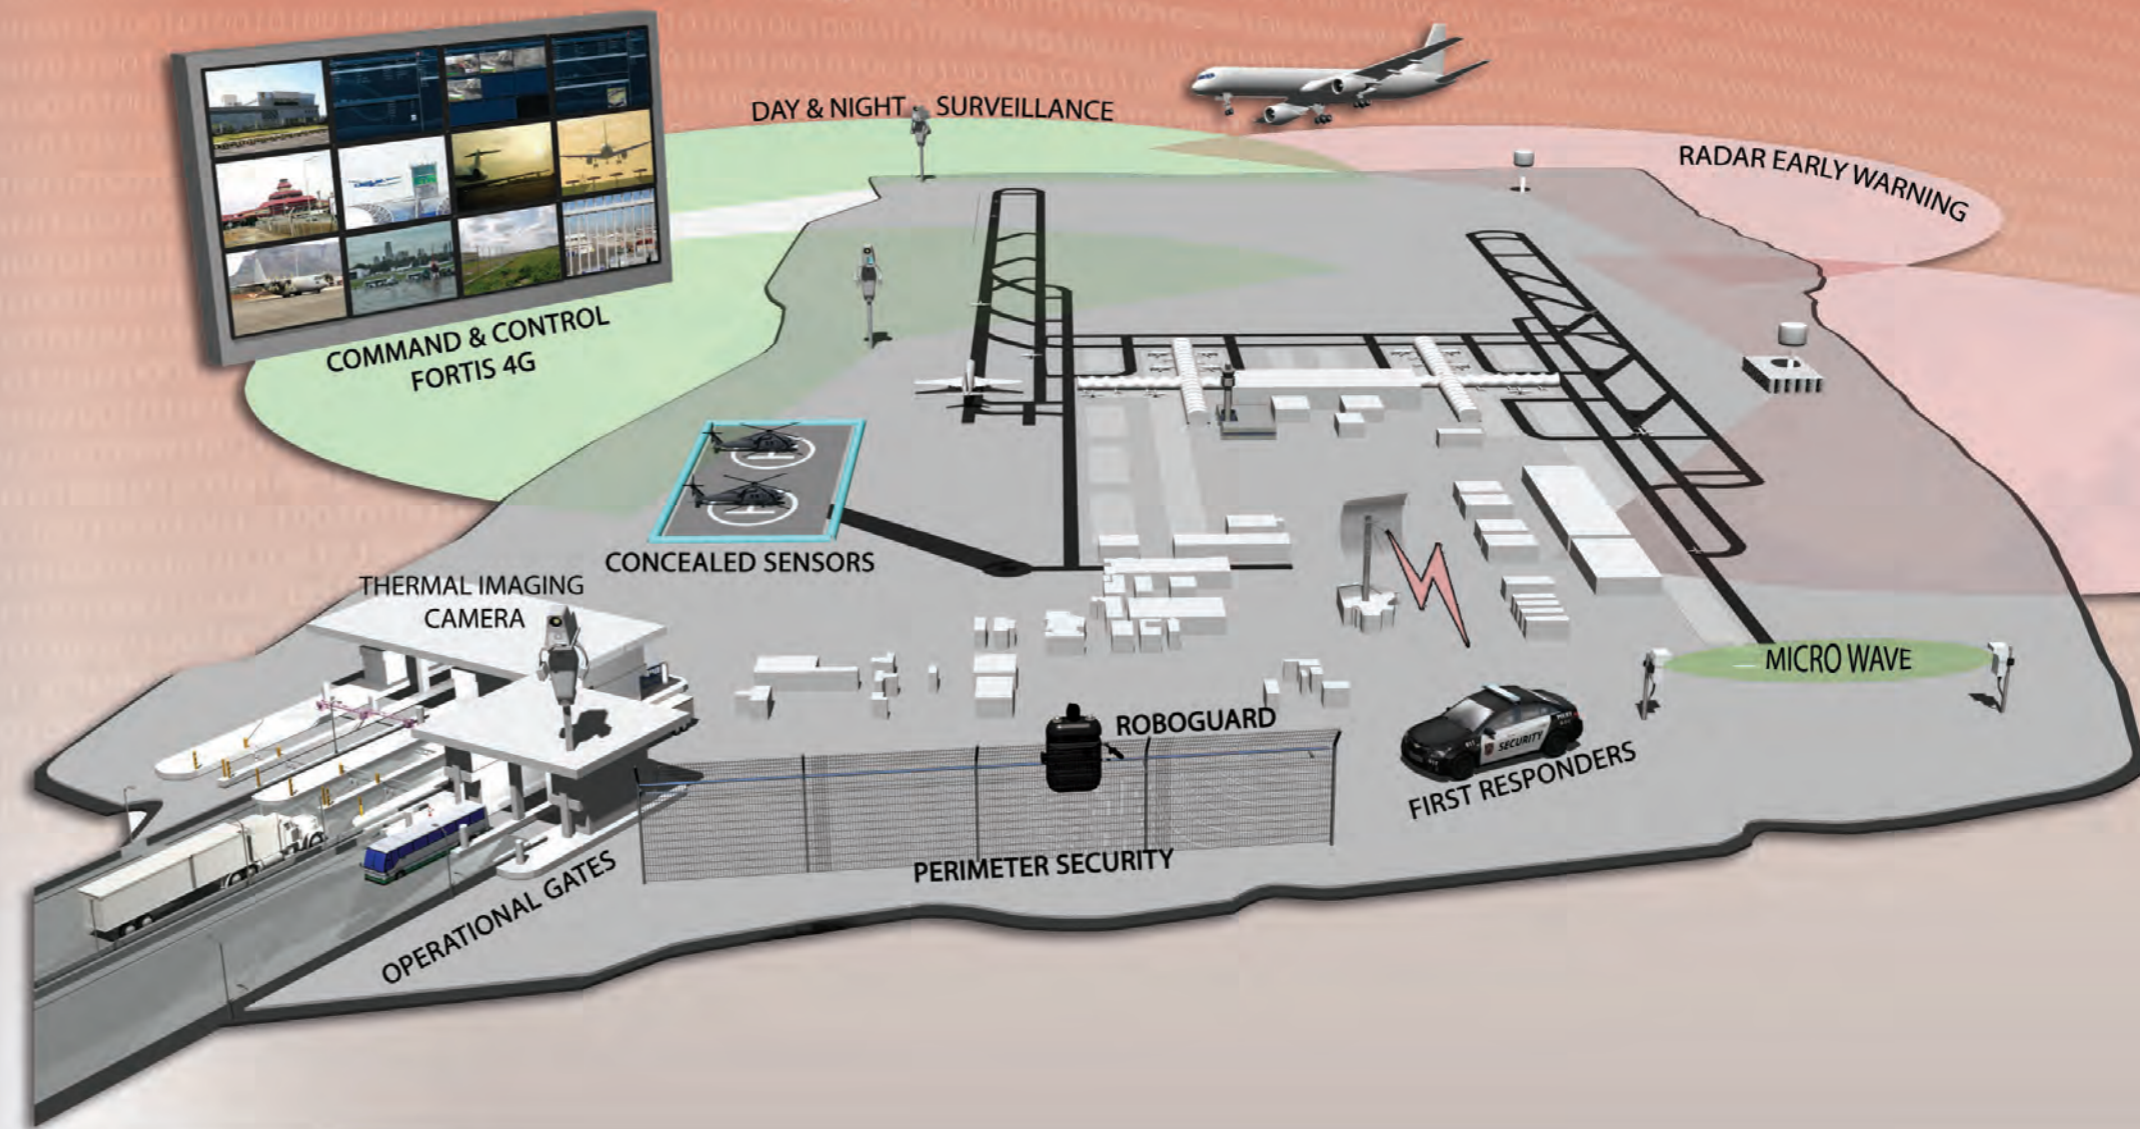

Magal S3 delivers comprehensive solutions for:

- Securing the perimeter and operational gates
- Securing outdoor assets, parking lots and logistic areas
- Managing passengers screening and the terminal area

The solutions ensure stringent security without compromising the smooth airport's operation, based on integrated automation and tricked implementation. Magal ensures, through automation, stringent security without compromising the smooth airport's operation

Core technologies

- User friendly hierarchical management system (PSIM)
- State-of-the-art Perimeter Detection (PIDS)
- Long and short range HD CCTV, thermal cameras
- Embedded intelligent video analytics (IVA)

Indoor Solutions

- Automated gates for passengers, staff and equipment
- Screening systems for passengers, luggage and equipment
- HD CCTV with intelligent analytics (IVA & VMD)
- Communication and public address
- integration by a central C&C system

Outdoor Solutions

- Multilayer perimeter intrusion detection system (PIDS), supported by RoboGuard
- Long range surveillance - radars and thermal cameras
- Automated gates for trucks, cars and people
- Screening solutions for cargo and passengers
- Management and security for parking areas
- Fotis4G - Central advanced command and control system
